To be held on:

October 14, 2004, at 6:00-7:30 p.m. in the Swayduck Auditorium, First Floor, 65 Fifth Avenue (between East 13-14th), New York, NY. Admission is free. RSVP 212-229-5808 ext. 101 or email [<DoveR@newschool.edu>](mailto:DoveR@newschool.edu) to reserve seating. Visit www.dialnsa.edu for a live webcast and online discussion. Event announcement and links to background material available online at www.plensia.org.

About this program:

Security and liberty are not dichotomous rivals to be traded one for the other in a zero sum game; rather, they are dual obligations of civil society, each to be maximized within the constraints imposed by the other. How can these dual obligations of collective security and individual freedom, including privacy, best be achieved given current developments in information technologies and the threat of international terrorism? The panelists will offer their views on these and related issues. This panel discussion is the first in a series of public discussions to be held as part of the Global Information Society Project's Program on Law Enforcement and National Security in the Information Age (www.plensia.org).

About the Global Information Society Project:

The Global Information Society Project (www.global-info-society.org) is a collaborative research project between the World Policy Institute and the Center for Advanced Studies in Science and Technology Policy focused on information, communication, and technology policy and related issues, especially as such policy impacts on the development of civil society, international relations, world trade, economic development, and national and global security.

About the World Policy Institute:

The World Policy Institute (www.worldpolicy.org) at New School University is a research and education policy center that seeks innovative solutions to critical problems facing the United States and the world. WPI has been a source of informed policy leadership for close to 40 years and is renowned for its cutting-edge analysis on managing the global market economy, constructing a workable system for collective security, and fostering civil society.

About the Center for Advanced Studies:

The Center for Advanced Studies in Science and Technology Policy (www.advancedstudies.org) is a private, non-partisan research and advisory organization focused on information, technology, and national security policy and related issues.
